To: Tri Star Industrial Supply
From: Bob Corson *BC*
Subject: Odor complaint
Date: February 10, 1997

On this date, at approximately 4:15 pm, Randy Lyman received a call from the fire department concerning an odor complaint they were presently working at Tri Star Industrial Supply, 725 N West Bypass.

I responded to the scene to determine if the cause of the odors could be coming from the sanitary sewer. Using both the Bacharach Sniffer and the Neotronics Model 50, I checked the atmosphere in manholes 1 and 2 on map N15 - SE 1/4. Explosive readings on both meters were zero. The oxygen reading was 20.7 ppm and the H₂S and CO readings were zero.

I went to the Tri Star building and advised Fire Battalion Chief Lee Iler of my findings. He indicated that they felt that the odor probably was coming from some of the chemicals stored in the building. They were still trying to locate the source as I left the site.
